**Web of Science**

*Web of Science* is an interdisciplinary science database that provides access to many core chemistry journals.

**Access:** Web of Science is accessible from the library website:
1. Go to [http://library.macewan.ca](http://library.macewan.ca) and click on *Find a Database*.
2. Select the letter *W*.
3. Scroll down until you see the title *Web of Science* and click on it.

**Find Citing Articles:** Web of Science allows you to search for an article and then see a list of all of the articles that have cited that article. Follow the instructions below to find citing articles.
1. Open Web of Science.
2. From the dropdown menu next to *Basic Search* select *Cited Reference Search*.
3. Using the article you want to find citing articles for, enter the following information into the three search boxes:
   a. In the first search box enter the author’s last name and first initial.
   b. In the second search box enter the journal name or abbreviated name.
   c. In the third search box enter the publication year.
4. Click on the *Search* button.
5. Once you get your results, click on the *View Record* link for your article.
6. This takes you to the record for the article you searched for. The right side of the screen will tell you how many articles have cited your article and you can click on the hyperlinked number to see a list of those articles.
